

Wireless Guides :: Mac OS X

Supports Mac OS 10.4 "Tiger" and Later

1. From the menu bar select the Airport icon and turn Airport on. Select the SSID LSUSWireless from the Airport Menu.

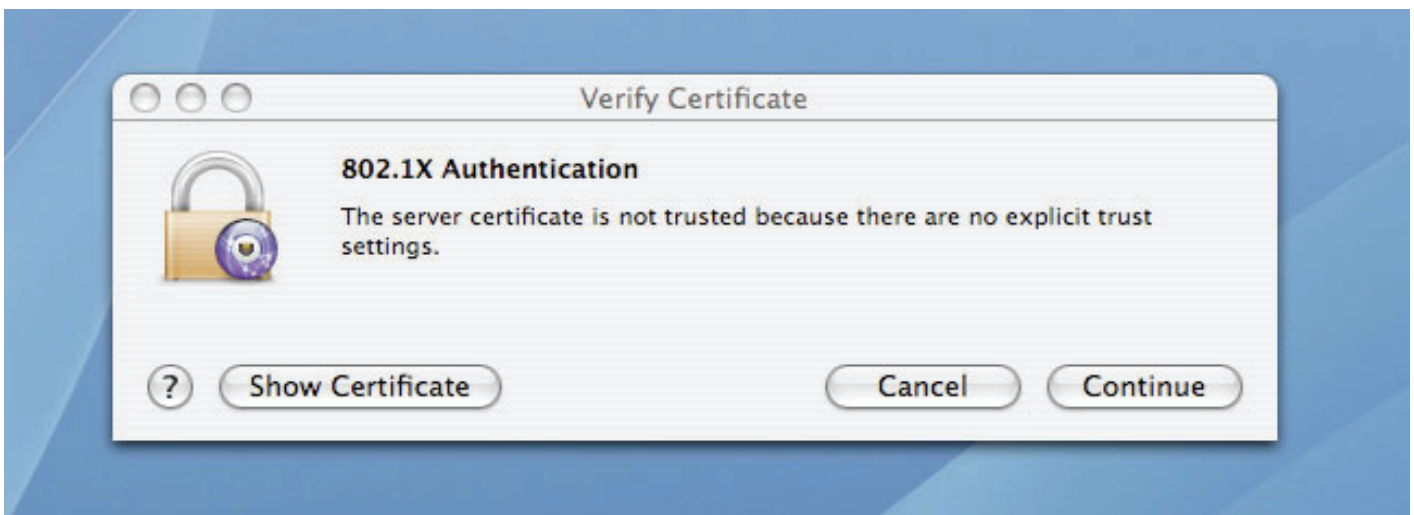

2. Enter your username and password in the appropriate fields. Remember password in my keychain is optional.

Your user name is your email logon ID and password.

3. Verify the Certificate by clicking Continue. You will be connected to LSUSWireless at this point.

4. Future attempts to gain access may result in the user being prompted for 802.1X Authentication. Enter your username and password in the appropriated text fields and click OK. You will be connected to LSUSWireless at this point.

The image shows a dialog box titled "802.1X Authentication". On the left side, there is a circular icon with a purple and blue gradient, containing a white network jack symbol. To the right of the icon, the title "802.1X Authentication" is displayed in bold black text. Below the title, there are two text input fields. The first field is preceded by the label "User Name:" and the second field is preceded by the label "Password:". At the bottom right of the dialog box, there are two buttons: "Cancel" and "OK", both with rounded rectangular shapes and a light gray gradient.
