2021-2022 Student Housing Covid Protocols

Isolation and Quarantine

Isolation separates sick people with a contagious disease from people who are not sick. Quarantine separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick.

The first option is for the resident who has been in close contact with someone who tested positive for COVID-19 or who tests positive to quarantine in PPA provided quarantine unit. If there is no space in the quarantine unit, the resident may be asked to self-quarantine in place or off-site accommodations will be arranged. Residents that have a confirmed, positive COVID test will be isolated in a quarantine unit as space allows. Off-site accommodations may be made for these tenants as well. The duration of the quarantine/isolation is subject the CDC recommendations at that time.

*Only 2 residents will be allowed in the quarantine unit at one time, with each of them occupying a separate side of the apartment.*

Residents that exhibit any signs or symptoms of COVID-19 or who have been in close contact with someone who tested positive for COVID-19 must:

- Contact a medical provider within one (1) business day and self-quarantine.
- Report symptoms to a PPA staff member immediately via email at resident@pilotspointe.com.
- Inform their roommates of the potential exposure to COVID.

Cleaning

Upon learning of a positive covid diagnosis and transfer of the resident to a temporary living arrangement, a PPA staff member will conduct an electrostatic spray to sanitize their unit. The quarantine unit will be cleaned and sprayed before and after any resident is moved in. Facials masks will be worn at all times when entering these units. As a preventative measure, the community clubhouse and laundry areas will be sanitized daily with electrostatic spray.
