Resources · Risk Management · United States Military Healthcare

### GRADUATE TESTIMONIALS

"I learned a lot about healthcare and learned so many things about the organization that I currently work for. I feel much more confident now in my abilities as a healthcare employee."

"I think that the program was a great investment and incredibly helpful in my career path. The program, hands down, is the best way to become a competent and strategic healthcare manager regardless of experience or background."

"I enjoyed the program as a whole. The ability to balance the program's requirements with a busy work and home life was crucial to my success. I love the way the courses are structured. It allowed me to truly focus on each topic and learn as much as possible, rather than have my attention spread out over several courses at once."

"I was always suspicious of online classes, but MHA program changed my perspective. It is worth taking the program."
