

Louisiana in Focus:

Louisiana's Increasing Senior Population 1980 to 2024

It's no secret that America is getting older. Declining birth rates and longer life expectancy have aged our country. Between 1980 and 2024 the median age for the United States increased from 29.8 to 39.1. The same is true for Louisiana. The median age for Louisiana has increased from 27.4 in 1980 to 38.4 in 2024. Figure 1 compares the median age in the United States to Louisiana between 1980 and 2024. As can be seen, Louisiana has experienced a slightly greater increase than the United States.

Figure 1. Median Age 1980-2024 in the United States and Louisiana

Source: U.S. Census Bureau, 1980-2020 Decennial Censuses and Vintage 2024 Population Estimates

In 1980, only 11 parishes had a median age over 30, by 2024 only one parish had a median age under 30 and 25 had a median age over 40. See table 1 for each individual parish. This increase in median age has been driven by the change in the percentage of our population that is under 18 (children) and the percentage of the population aged 65 or older (seniors). As can be seen in Figure 2 the ratio of children to seniors in Louisiana has decreased from

3.3 in 1980 to 1.3 in 2024. This decrease for Louisiana is larger than what has occurred in the United States as a whole.

Figure 2. Children to Seniors Ratio 1980-2024

Source: U.S. Census Bureau, 1980-2020 Decennial Censuses and Vintage 2024 Population Estimates

The percentage of Louisiana's population, that is children, decreased from 31.6% in 1980 to 23.2% in 2024. As can be seen in Figure 3, this decrease mirrors what's happening to the United States. While the percentage of our population, that is children, is decreasing, the opposite is happening for seniors. Louisiana's seniors' population increased from 9.6% in 1980 to 17.7% in 2024. As can be seen in Figure 4, this increase is a larger than United States increase.

Figure 3. Percent of Population Under 18, 1980-2024

Figure 4. Percent of Population 65 and Older, 1980-2024

Comparing the number of seniors to children in the Census' 2024 Vintage 2024 Population Estimates, we find that in 10 parishes seniors outnumber children. These parishes are highlighted in figure 5.

Source: U.S. Census Bureau, Vintage 2024 Population Estimates

We can see how the state has aged if we compare the percentage of seniors in 1980, 2000, and 2024. The World Health Organization and the United Nations categorize countries as aging (if 7-13.9% of the population is seniors), aged (14-20.9% seniors), or super-aged (21% or more seniors). If we apply those categories to Louisiana's parishes, we can see that in 1980, 17 parishes were aged, 38 were aging, and the remaining 9 parishes were neither. As can be seen in figure 6, by 2000 there were 46 parishes that were aging and the remaining 18 were aged. In 2024, only one parish remained as aging, 48 parishes were aged, and 15 parishes were super-aged. These super-aged parishes tend to be concentrated in the northern part of the state.

Figure 6. Aging, Aged, and Super-Aged Parishes 1980, 2000, & 2024

This demographic change has large policy implications from the amount of required elder care, types of housing, labor force makeup and participation, etc. The remainder of the report shows how the individual parishes compare to each other and breaks out the children to senior ratio for Louisiana's four largest MSAs.

Table 1. Median Age 1980-2024 in Louisiana

	1980	1990	2000	2010	2020	2024
Acadia Parish	27.0	30.5	33.7	35.7	39.1	37.8
